WORK EXPERIENCE

Civil Service Fast Stream Graduate Scheme

London, 2016 - 2019

- Finance Business Partner at the Department For Business, Environment and Industrial Strategy, Department for Work and Pensions and Department for Transport, during my 3 year rotational programme.

Business Analyst, Wentworth Golf Club

Virginia Water, 2019 - 2020

- Implemented a new financial reporting system for management to track daily, weekly and monthly figures to help improve operations at the club.

SOFTWARE PROJECTS

Personal Website: www.aunabdi.dev (for more information)

Gazetteer

- Developed a geolocation application that displays information based on current, and selected locations.
- The application makes use of REST API's to call on realtime data, and display the information onto the website.
- Incorporated map bounds and points-of-interest locations onto the map to aid user experience.

Company Directory

- Created a company directory application using SQL databases to make use of CRUD functionality.
- The application allows the user to create, view, update and delete users, locations and departments, while displaying each separately.
- The application also makes use of Bootstrap 5 to aid a clean and uniformed design pattern.

Book Store

- Built a bookstore app using React and CommerceJS.
- The app allows the user to view books in the library and add them to the cart.
- You can also view a short summary of the book.

Todo App

- Produced a React basic todo-list that allows the user to add and remove todo's from the list.
- There is also an option to toggle between complete and incomplete todo's.

EXTRA CURRICULAR

Book Talk Today Podcast

2020 - Present

I interview authors to discuss the ideas and principles inside of their books. The podcast has amassed over 50k downloads.
